Aluminum Manifolds

These high-quality color coded aluminum manifolds are produced in the USA with superior engineering. This functional manifold is the result of years of experience. These manifolds are designed to be used with std. mounting clamps produced by Hydro-Craft Inc. (not included). We offer the following advantages over competitive manifolds:

- 1) Designed for use with Air, Water, or Hydraulic fluid up to 1000 PSI.
- 2) Corrosion resistant anodized finish.
- 3) Color coded for different application. (**Blue** - air, **Red** - warm water, **Black** - cold water)
- 4) Available in two inlet port sizes and a variety of outlet configurations.
- 5) Ports are located at 45° to take advantage of standard industrial fittings.
- 6) Function well at higher operating temperatures.
- 7) Custom designs and colors are available for your custom application upon request.

Note: We are not liable for any damage arising from faulty installation, misapplication, or abuse of this product.
